Maintenance tips

Please note that high-quality products out of stainless steel, such as this unit, do require care. Otherwise, the stainless steel may, under certain circumstances, develop corrosion spots.

Therefore, please:

- do not use any salt- or chlorine-containing agents (applies also to liquid soap);
- avoid contact with iron containing items.

Please use only:

- for cleaning, a neutral, mild household cleaning agent;
- for care, a standard stainless steel care cleaner.
